TRANSPORT ONE - COMPLETE DRIVER DATA & FLEET TRACKING MANUAL

Official Enterprise Specification & System Data Guide | Cloud Sync (Web & Mobile APK)

1. REGISTERED FLEET DRIVERS & VEHICLE MAPPING

The Transport One system connects each driver mobile application session to a designated vehicle and unified cloud profile. Below is the active roster configured in the system:

Driver Name	Phone Number	Assigned Vehicle	Cloud Login ID	Assigned Role & App Access
Sandeep	+91 63555 83474	**GJ19Y2720**	sandeep@transport1.com	Primary Line Haul Driver (Full Duty, Nav, Expenses, POD)
Dadarao	+91 80077 55389	**GJ19J6633**	dadarao@transport1.com	Heavy Goods Driver (Attendance, GPS, Sunday Clean, POD)
Ramrao	+91 76002 91483	**GJ19J6633**	ramrao@transport1.com	Relief Driver / Co-Pilot (GPS, Expense Slips, Challan Log)
Devidas	+91 97264 23091	**GJ19Y4628**	devidas@transport1.com	Regional Cargo Driver (Live Route, Pre-Trip Seatbelt, POD)
Ashok Tempo	+91 63542 15071	**GJ19Y0829**	ashok@transport1.com	City Distribution / Tempo (Last-Mile Delivery, Fast POD)
Ajay	+91 90812 55626	**GJ19Z0901**	ajay@transport1.com	Fleet Driver (Full Desk Access, Tyres & Fluids, RTO Memos)

2. COMPLETE LIST OF ALL DATA RECORDED FROM DRIVERS (10 MODULES)

Every driver action on the mobile APK is captured with GPS, timestamps, telemetry, and photographic evidence, then synced live to Cloud Firestore for Admin review:

1. Duty & Shift Attendance (Duty & Haziri)

Data Field Name	System Purpose, Capture Method & Admin Value
Start Duty Time	Exact timestamp when driver clicks ON DUTY in the morning.
End Duty Time	Exact timestamp when driver clicks OFF DUTY at night.
Total Shift Duration	Calculated active duty hours (e.g. 9h 45m).
Duty Location (GPS)	Latitude/Longitude & Reverse Geocoded address at punch-in/out.
Odometer at Start & End	Vehicle starting KM and closing KM for daily distance tally.
Driver Status	Real-time indicator: ON DUTY (Green) or OFF DUTY (Grey).

2. Live GPS & Real-time Telematics (Live GPS Tracking)

Data Field Name	System Purpose, Capture Method & Admin Value
Real-Time Coordinates	Latitude & Longitude updated every 5-10 seconds.
Live Vehicle Speed	Current driving speed in km/h with overspeed alerts (>60/80 km/h).
Movement State	Moving (Green), Idle with engine on (Amber), or Stationary/Parked (Red).
Ignition / Engine Status	Engine ON / OFF sensor data via telematics / phone motion sensors.
Battery & Signal Quality	Driver phone battery level (%) and network signal reliability.
GPS Breadcrumb History	Complete historical route trail showing actual path taken vs planned route.

3. Pre-Trip Seatbelt Safety Verification (Seatbelt Photo & AI Verification)

Data Field Name	System Purpose, Capture Method & Admin Value
Driver Cabin Selfie	Live front-camera photo of driver wearing seatbelt before vehicle moves.
AI Belt Detection Status	Automated ML verification: Belt Detected (Verified) vs Not Found (Violation).
Capture Geo-Stamp	Precise GPS coordinates where selfie was taken (e.g. Bardoli, Surat).
Capture Timestamp	Date & exact minute of photo capture (e.g. Tue, 27 Oct 7:12 PM).
Trip Lock Mechanism	Prevents starting a loaded trip if seatbelt compliance is missing.

4. Sunday Mandatory Vehicle Cleaning (Sunday Gadi Dhulai)

Data Field Name	System Purpose, Capture Method & Admin Value
Washed Vehicle Photo	Photo of cleaned vehicle interior cabin and exterior body.
Cleaning Submission Date	Deduplication check ensuring cleaning is logged every Sunday.
Washing Location Stamp	GPS location of wash station or company parking bay.
Admin Approval Status	Pending / Verified / Needs Re-wash indicator.

5. Live Trip Progress & Waypoint Navigation (Trip & Turn-by-Turn Nav)

Data Field Name	System Purpose, Capture Method & Admin Value
Trip ID & Cargo Consignment	Linked Trip Number (e.g. LIVE-GJ19Y2720 / TRP-1049).
Remaining Distance	Accurate highway/road distance to delivery point in kilometers (e.g. 45.2 km).
Estimated Time of Arrival (ETA)	Live traffic-adjusted arrival time (e.g. 18:30 PM).
Next Turn Direction	Live maneuver card (e.g. 1.2 km baad baayein mudein / Turn Left).
Pickup & Drop Geo-Fences	Automatic timestamp logged when truck enters 200m of customer site.

6. Digital Proof of Delivery - POD (Bilty / Delivery Receipt)

Data Field Name	System Purpose, Capture Method & Admin Value
Signed LR / Bilty Photo	High-res image of customer signed and stamped receiving copy.
Receiving Person Name	Full name of person who received the goods at warehouse/factory.
Receiver Phone Number	Contact mobile number for automated delivery confirmation SMS.
Delivered vs Short/Damaged Quantity	Pieces received intact, shortage quantity, and damage notes.
Delivery Timestamp & Location	Irrefutable GPS and time stamp proving on-site unloading.

7. Enroute Trip Expenses & Diesel Slips (Diesel & Road Expenses)

Data Field Name	System Purpose, Capture Method & Admin Value
Diesel Purchase Slip Photo	Receipt photo showing fuel pump name, date, and liters pumped.
Fuel Amount (Rs) & Liters	Total rupees spent and fuel quantity for mileage calculation (km/L).
Toll Plaza Payments	Fastag / Cash toll receipts uploaded with toll plaza name.
Driver Bhatta & Night Halt	Food allowance, room rent, and enroute vehicle maintenance.
Payment Mode	Company Fastag, Driver Cash, or UPI QR code scan transaction.

8. Police / RTO Challan & Memos (Police / RTO Challan)

Data Field Name	System Purpose, Capture Method & Admin Value
Challan Slip Photo	High-resolution photo of traffic police or RTO citation slip.
Fine Amount (Rs)	Exact monetary fine levied by authority.
Violation Reason	Overloading, lane cutting, missing PUC, parking, or overspeeding.
Date, Time & Exact Location	Intersection / Highway NH location where challan was issued.
Payment Status	Paid by Driver enroute / Pending Head Office settlement.

9. Daily Vehicle Fluids & Tyre Inspections (Daily Vehicle Check)

Data Field Name	System Purpose, Capture Method & Admin Value
Engine Oil & Coolant Level	OK / LOW status checked each morning before starting.
DEF (AdBlue) Level	Diesel Exhaust Fluid tank percentage.
Brake & Clutch Fluid	Hydraulic fluid pressure check status.
Tyre Replacement & Condition	KM reading when tyre changed, tyre position (Front Left, Rear Right, etc.).

10. Driver Identity, License & Compliance (DL & Insurance)

Data Field Name	System Purpose, Capture Method & Admin Value
Driving License (DL)	DL number, expiry date, and scanned photo of physical card.
Driver Medical & Bima Policy	Insurance policy number and medical validity date.
Emergency Contact	Relative name and phone number for accidents or emergency rescue.

3. DATA FLOW: HOW DRIVER MOBILE DATA REACHES ADMIN PC

The system uses a 4-tier real-time synchronisation pipeline ensuring 100% data fidelity between driver phones and head-office dashboards:

Step	Tier	Process & Data Handshake	Network Fallback
1	**Driver Phone (APK)**	Driver captures photos, punches duty, or navigates. App saves record to local SQLite/Hive database instantly.	Works 100% offline without 4G.
2	**Cloud Firestore Sync**	As soon as 4G/WiFi is available, encrypted SSL stream uploads record to Google Cloud Firestore database.	Auto-retry with backoff.
3	**Security Rules Engine**	Firebase rules validate driver identity, ensure no cross-company data leakage, and index records.	Token validation enforced.
4	**Admin Dashboard (Web/PC)**	Admin web console receives live real-time snapshot listener update without needing to refresh page.	Zero delay live notifications.

4. ADMIN CONSOLE: WHERE TO VIEW EACH DATA CATEGORY

To monitor your fleet, open the Transport One Web or Mobile app and navigate to these dedicated screens:

Data Module	Screen / Tab Name	Key Features Available to Admin
Live Tracking & ETA	Live Route / Map Workspace	Satellite map, 100% smooth road polyline, live speed gauge, breadcrumbs, remaining KM.
Driver Desk & Photos	Driver Desk Tab	Seatbelt photos with AI badges, Sunday cleaning gallary, RTO challan slips, daily fluids.
Trips & Proof of Delivery	Trips & Consignments Tab	Trip creation, vehicle assignment, customer POD download, shortage/damage reports.
Financials & Diesel	Expenses & Accounts Tab	Fuel bill approval, toll deduction audit, driver bhatta settlement, total trip cost.
Driver Compliance	Fleet & Driver Profile Tab	DL expiration alerts, insurance renewal countdown, emergency contact directory.

Generated automatically by Transport One Fleet Management Suite. All telematics, photo uploads, and location coordinates are protected by Cloud Firestore enterprise security rules.
